DATA STRUCTURE AND PROGRAM DESIGN LAB – 05

5. Write a program to insert Number of Nodes in the Binary Tree and Traverse in Inorder , Preorder and Post Order and Search an element in Binary Tree(Display NULL if not found, If found Display Found)

```
Enter number of nodes: 5
Enter value for node 1: 12
Enter value for node 2: 23
Enter value for node 3: 34
Enter value for node 4: 45
Enter value for node 5: 56

Inorder Traversal: 12 23 34 45 56
Preorder Traversal: 12 23 34 45 56
Postorder Traversal: 56 45 34 23 12

Enter element to search: 23
Found
```
